Eli's Village provides comprehensive planning for special needs families through their 3-step process that includes asset protections, legal protections, and family protection services. Ensuring the proper funding streams are in place to support the cost of care for the disabled individual. The appropriate legal protections are in place, like a Special Needs Trust, Microboard, and Power of Attorney. Family services would include advocating for public benefits, therapies, supports, and understanding the care needs for the disabled individual. They take a holistic approach that includes the entire family, not just the individual with special needs.
